1,3-Butadiene | CH2CHCHCH2 - PubChem Sources of 1,3-butadiene released into the air include motor vehicle exhaust, manufacturing and processing facilities, forest fires or other combustion, and cigarette smoke. 1,3-Butadiene was detected in ambient air of cities and suburban areas from 1970 to 1982 at an average level of 0.3 parts per billion (ppb). Measurements of environmental 1,3-butadiene with pumped ... US Standard Methods also exist for pumped sampling of VOCs (see for example, US EPA Method TO-17, 1999), but these are not adequately validated specifically for 1,3-butadiene and there is no such method yet for diffusive sampling of this compound. Health and Safety Laboratory 3 1,3-Butadiene, CAS Number 106-99-0, synonym buta-1,3-diene, CH2=CHCH=CH2, is a colourless gas of boiling point -4°C . The liquefied gas has a vapour pressure.

Hexachlorobutadiene | C4Cl6 - PubChem These findings indicate that reactive thiol moiety formed by cysteine conjugate beta-lyase cleavage of S-(1,2,3,4,4-pentachloro-1,3-butadienyl)-L-cysteine can inhibit both glutathione reductase & lipoyl dehydrogenase activities in vivo following hexachloro-1,3-butadiene admin. We suggest that such inhibition is a general phenomenon, occurring. 1 3 Butadiene In Air Laboratory Method Using Pumped ...
